

Local Agency Bridge Bundling Pilot Project (Design-Build)

Questions & Answers

July 7, 2020

Question: Will the bridge safety inspection reports be made available?

Answer: A RFQ addendum will be issued to update the RID Index, which will include the available safety inspection reports from the MiBridge System. The new RID files will be available upon posting of the addendum.

Question: Regarding Attachment E which is the submitter introduction form, can the submitter create a cover letter which contains all information requested on the Attachment E form or must the submitter use the form provided?

Answer: No. A cover letter cannot be used in lieu of Attachment E (Submitter Information Form). The form ensures all required information is provided by each Submitter.

Question: If the form is to be used and we are bidding the project as a joint venture the form asks for information from each joint venture member. There is very little room on the form for each member's information. We request to be able to create our own attachment E so that we can clearly identify all information.

Answer: Additional pages may be attached to Attachment E (Submitter Information Form) to include all necessary information that does not fit on the form.
